Funding Opportunity Description

The Pacific Marine and Estuarine Fish Habitat Partnership (PMEP) is one of 20 regional fish habitat partnerships in the United States. Its mission is to provide science, data, and funding to conserve and restore West Coast nearshore and estuarine fish habitat. Learn more about PMEP at www.pacificfishhabitat.org. PMEP supports estuarine and nearshore marine fish habitat protection, restoration and

assessment projects through the [National Fish Habitat Partnership](https://www.pacificfishhabitat.org/nfhp/) (NFHP). To read about recent PMEP-funded projects, please visit <http://www.pacificfishhabitat.org/pmep-funded-projects/>.

Funding available, project budget, and matching funds requirement

PMEP will award an estimated \$250,000-\$350,000 in FY2025 for projects that advance its mission. This amount is based on previous funding received from the NFHP for this purpose. The exact amount of funding available varies annually and is not known at this time. In an effort to fund a diverse portfolio of projects, strong project proposals that request less than \$100,000 are preferred. However, proposals of particular merit may be funded at a higher level, at PMEP's discretion.

America's Conservation Enhancement (ACE) Act was passed by Congress and signed by the President on October 30, 2020. Importantly, the legislation made significant changes to project requirements to be eligible for NFHP funding. The ACE Act places an emphasis on restoration efforts that will improve recreational fishing opportunities and public use of the resource. Improvements in public access as a component of projects are also encouraged. The ACE Act requires that all NFHP-funded projects demonstrate matching funds, with some exceptions:

- All projects must show 1:1 non-federal financial match. Matching funds may be in the form of cash or in-kind support from non-federal sources and must be spent during the project period.
- Matching funding requirements are waived for projects proposed by tribal sponsors where the tribe is the applicant and funding recipient. Providing matching funds from tribes does not qualify a project for matching fund waivers.

A detailed project budget is required, specifying which components of the project will be paid for with PMEP funds, cost shared funds and the required matching funds. Funding status (in-hand, proposed, in-kind) should be indicated. See Appendix A for information required. Non-matching cost share funding includes federal funding that contributes to the project but is not eligible for formal matching requirement. Cost share details should also be included in the proposal budget.

The project, or portion of a project, that PMEP funds should be spent within three years of receipt of funding and all funds matching PMEP funding should be spent during that time. The proposal should include a detailed timeline for the use of PMEP funds. See Appendix B.

Project review period and timing of funding

Project sponsors should assume that funding will be received in Summer of 2025. See below timeline for project funding timeline.

Timeline for project funding*

December 1, 2023	Proposals due
January-February 2024	Proposal evaluation and project ranking by PMEP committees
February, 2024	Final approval of ranked project list by PMEP Steering Committee
March, 2024	Provision of ranked list to Congress by NFHP
Summer, 2024	Notification of project ranking (not award notification)
Winter or Spring, 2025	Announcement of award recipients*
Summer, 2025	Funding available*

*Subject to change. Funding availability is dependent upon the federal appropriations process.

Eligibility

Eligible applicants include state, tribal, and federal management agencies, non-governmental organizations (e.g., conservation groups, community associations, watershed councils, cooperatives, civic groups), municipalities, universities, schools, private landowners, and local governments.

Eligible projects

Restoration, enhancement, and protection projects - PMEP funding may be used to pay for a small habitat restoration or protection project or parts of a larger project. Restoration and protection project summaries should clearly describe the need for the project relative to regional or local restoration and protection planning efforts. Proposals should clearly detail which part of the project will utilize PMEP funds in the project budget, see Appendix A. PMEP funding can be used for all phases of a project, from feasibility to post-construction monitoring. However, projects that involve on-the-ground implementation will be more competitive.

Assessment projects - PMEP will fund assessment projects that fill data gaps identified for estuary and nearshore marine fish habitats in its region. Proposals should clearly justify the assessment in relation to needs identified in PMEP assessments, or other planning documents. PMEP encourages projects that assess the effectiveness of restoration techniques. If PMEP funds will be used to pay for part of a larger assessment project, proposals should clearly detail which part of the

project will utilize PMEP funds in the project budget (see Appendix A). Any data collected should conform with data collection methods recommended or used in PMEP assessments.

Acquisition projects - The ACE Act allows a state, local government, or other non-federal entity to receive NFHP funds for the acquisition of real property or protective easements involving willing sellers if the acquisition ensures public access for fish and wildlife-dependent recreation or contributes a scientifically based, direct enhancement to the health of fish and fish populations as determined by the NFHP Board. Acquisition projects will be evaluated using the same criteria as restoration projects and must address PMEP priorities. Please contact PMEP's Coordinator if you have a project request that includes real property acquisition.

Ineligible projects

PMEP will not fund the following types of projects:

- Placement of large woody debris without addressing long-term habitat quality improvements or other means of restoring connectivity and function.
- Salmonid-only habitat use assessments. Habitat use assessments must be primarily designed to elucidate the use of estuary or nearshore habitat by non-salmonid PMEP focal species. Assessments that focus on multiple species are preferred.
- Modification rather than removal of tide gates, unless the project will significantly improve both habitat connectivity and fish passage to areas above the tide gate.
- Projects located above impassable barriers.
- Research studies (fish habitat assessment projects can be funded and are not considered research).
- Stand-alone long-term monitoring (this includes long-term monitoring of fish populations).
- Outreach-only projects.
- Mitigation projects.

Ineligible costs

The following types of costs will not be paid for with PMEP funds:

- Pre-award costs.
- Operation and maintenance of facilities or structures. This applies to buildings and structures only and not to maintenance or construction of earthen structures.
- Actions required by existing regulatory programs (e.g. mitigation projects), except that funds may support activities under voluntary agreements that exceed regulatory requirements for conserving habitats (e.g., hydropower

licensing in which the licensee enters into a voluntary agreement to restore habitat that exceeds regulatory requirements).

- Incentive payments.

Priority Species and Priority Projects

Projects considered for funding should address science-based habitat protection, restoration, and enhancement activities that benefit fish habitat in PMEP's geographic scope. Assessment projects that fill identified data gaps about fish use and habitat will also be considered. PMEP's strategic plan recognizes the importance of juvenile rearing areas within estuaries, as well as nearshore habitats, for fish. Please review PMEP's strategic plan at https://www.pacificfishhabitat.org/wp-content/uploads/2022/10/Strategic-Plan-2023_2028-FINAL.pdf for more information about its focus and geographic scope.

PMEP is seeking project proposals that restore, enhance, and protect habitats for PMEP focal species within estuarine and nearshore marine systems or that increase understanding of fish habitats in estuarine and nearshore habitats. Priority will be given to projects benefiting smaller estuarine systems defined as having an Estuary Size Class of 0-250 acres in the PMEP Estuary Explorer data tool <http://estuaries.pacificfishhabitat.org/explore>. **However, worthy projects that benefit larger estuarine or nearshore systems will still be considered.**

PMEP has identified the following priority/focal species:

- Green sturgeon (*Acipenser medirostris*)
- Leopard shark (*Triakis semifasciata*)
- Bat ray (*Myliobatis californica*)
- Pacific herring (*Clupea pallasii*)
- Bay shrimp (*Crangon franciscorum*)
- Dungeness crab (*Cancer magister* or *Metacarcinus magister*)
- California halibut (*Paralichthys californicus*)
- English sole (*Parophrys vetulus*)
- Starry flounder (*Platichthys stellatus*)
- Shiner perch (*Cymatogaster aggregata*)
- Steelhead (*Oncorhynchus mykiss*)
- Coho salmon (*Oncorhynchus kisutch*)
- Chinook salmon (*Oncorhynchus tshawytscha*)
- Brown rockfish (*Sebastes auriculatus*)
- Staghorn sculpin (*Leptocottus armatus*)

Project proposals that benefit these priority species will score higher during the proposal evaluation process. **However, worthy projects that benefit other species will still be considered.**

Project proposals should also benefit USFWS priority species. The list of USFWS priority species can be found [here](#). Note that PMEP spans USFWS Regions 1 and 8.

Projects must also support at least one of the NFHP National Conservation Priorities¹:

1. Conserve waters and habitats where all processes and functions are operating within their expected range or natural variation.
2. Conserve hydrologic conditions for fish
3. Conserve physical and living habitats and features that support viable and sustainable species and/or populations in impacted or at-risk systems.
4. Reconnect fragmented fish habitats.
5. Conserve water quality for fish.
6. Support the structure and function of FHPs.
7. Enhance recreational, commercial, subsistence, and traditional fishing opportunities when conducting projects that conserve fish habitat.

Access this [site](#) for a fuller explanation of NFHP National Conservation Priorities.

Climate and ocean change

Restoration project proposals will be evaluated with climate and ocean change dynamics in mind. Projects should identify how they will perform under climate and ocean change scenarios and how they will contribute to ecological resilience over time. Assessment projects that improve our understanding of the threats to fish habitat posed by climate and ocean change are also welcomed. Applicants should cite appropriate climate and ocean change models, assessments, or scientific studies they have used to develop their project.

Project monitoring

All project proposals must include a monitoring plan. At a minimum, projects should describe the implementation monitoring plan designed to document that the project was constructed or completed as proposed. Additional effectiveness monitoring is advised, though the short timeframe available for spending PMEP funds generally does not allow use for long-term effectiveness monitoring. For a

¹ Conserve means restore, enhance, and protect.

good description of the difference between implementation and effectiveness monitoring, please see <https://www.fisheries.noaa.gov/national/habitat-conservation/monitoring-and-evaluation-restoration-projects>.

Project monitoring plans will be evaluated on the extent to which they:

1. Appropriately assess the biological, ecological, or other results of the PMEP funded activities.
2. Articulate adaptive management strategies if the monitoring indicates that project objectives are not being met.
3. Identify improvements to existing fish populations, recreational fishing opportunities for the local community of the fish habitat conservation project.
4. Include completion of a monitoring report, which should be submitted at project completion, describing monitoring results and conclusions.

Acquisition and assessment projects must also include a monitoring plan. These plans should include methods to monitor project progress, including evaluation of progress at key milestones, such as data collection, draft reporting, etc.

Data collection

If applicable, the spatial extent (lines and polygons) of tidally restored areas should be mapped, and spatial data (kml, kmz, shapefile, or feature class) should be provided to PMEP for inclusion in its Tidally Restored Areas data layer. See the report “U.S. West Coast Mapping of Restored Tidal Areas: Methodology, Results & Recommendations (2019)” for information about project attributes that should be reported along with spatial data.

Diversity, Equity, and Inclusion

PMEP strives to include the full suite of perspectives, knowledge, innovation, and lived experiences of individuals and communities on the West Coast into our work. Projects that are led by, meaningfully engage, or benefit populations that historically have been—and remain — underrepresented in grant making and among practitioners in the field and marginalized or underserved in the broader society are welcomed. We acknowledge and respect that there are many ways to define diversity, equity, and inclusion – concepts that can encompass many human differences. For the purposes of this grant, we welcome projects that involve

meaningful engagement from all groups and are particularly encouraging applications from the following:

- Black, Indigenous, and People of Color (BIPOC)
- LGBTQ populations
- People with disabilities
- Women

How to Apply

To apply for funding, complete and submit the online application at <https://form.jotform.com/232676998733173>

Upload into Jotform either pdf or xlsx files of Appendices A, B, and C.

See below for an example of the Jotform application questions. **Incomplete or late applications will not be considered. The deadline for project proposal submissions into Jotform is 5:00 PM PST, Friday, December 1, 2023.**

Notification of awards will be made in summer of 2024, and funds are expected to be awarded in the summer of 2025. Please note that this funding is linked to the federal budget.

If you have any questions, please contact the PMEP Coordinator, Joan Drinkwin, at (<mailto:info@pacificfishhabitat.org>) or jdrinkwin@nrccorp.com.

Evaluation Criteria

Projects will be evaluated by an objective review panel of PMEP partners, who will consider the following criteria:

1. The capabilities and experience of project proponents.
2. The extent to which the proposed project:
 - a. Relates to/aligns with PMEP priorities.
 - b. Fulfills a local or regional priority that is directly linked to PMEP's Strategic Plan OR addresses an emerging issue or tests new restoration techniques. Please review PMEP's strategic plan at https://www.pacificfishhabitat.org/wp-content/uploads/2022/10/Strategic-Plan-2023_2028-FINAL.pdf for more information about its focus and geographic scope.

- c. Addresses the national conservation priorities established by the NFHP. For a full description of NFHP goals and objectives, see [The National Fish Habitat Action Plan, 2nd edition](#).
 - d. Is supported by the findings of PMEP's or NFHP's habitat assessment and aligns, or is compatible with, other conservation plans, such as species recovery plans.
 - e. Addresses the causes and processes behind the decline of fish or fish habitats.
 - f. Effectively engages partners with federal, state, and local governments, Indian tribes, and private entities.
 - g. Identifies appropriate monitoring and evaluation measures and criteria that are compatible with national measures. See details on monitoring plans above.
 - h. Is cost-effective.
 - (A) Provides a well-defined budget linked to deliverables and outcomes.
 - (B) Leverages other funds to implement the project.
 - i. Includes an outreach or education component that includes the local or regional community.
 - j. Benefits underrepresented groups as explained above.
3. The extent to which the project will result in:
- a. Broad ecological benefit.
 - b. Benefits for the habitat of one or more of PMEP's 15 focal species and priority species of the USFWS.
 - c. Increased fish populations in a manner that leads to recreational fishing opportunities for the public.
 - d. Increased public access to land or water for fish and wildlife-dependent recreational opportunities, including visual access.
 - e. Advancement of the conservation of fish and wildlife species that have been identified by a state agency as species of greatest conservation need.
 - f. Where appropriate, advancement of the conservation of fish and fish habitats under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.) and other relevant federal law and state wildlife action plans.
 - g. Promotion of strong and healthy fish habitats so that desired biological communities are able to persist and adapt to stressors such as climate and ocean change.
 - h. Demonstrated results within a reasonable timeframe.
 - i. Recognition and engagement of the full suite of perspectives, knowledge, innovation, and lived experiences of individuals and communities on the West Coast.

Appendix A: Budget Sheet Template

Please attach budget sheets in .xlsx or .pdf format to your application. If using .xlsx, please send one file with two clearly marked sheets within the file. One sheet should outline the detailed project budget and the other should outline funding sources and status of that funding. See below for example formats to follow.

DETAILED PROJECT BUDGET							
PROJECT NAME							
	# Units	Unit	Unit Price	PMEP funds Requested	Matching Funds	Cost Share	Total Project Cost
A. PERSONNEL SERVICES (add rows for each item/person)							
B. FRINGE BENEFITS							
C. TRAVEL							
D. EQUIPMENT							
E. SUPPLIES							
F. CONTRACTUAL							
G. CONSTRUCTION							
H. OTHER							
I. TOTAL DIRECT CHARGES							
J. INDIRECT CHARGES

			Number of datasets or data tools developed	#	
Monitoring	Monitoring	Monitoring Programs	Number of monitoring frameworks developed	#	
			Length of habitat monitored	# miles	
			Area of habitat monitored	# acres	
			Monitoring timeframe	# years	

Appendix D. Jotform Application

PMEP Application for project funding - FY2025

All fields marked with * are required and must be filled.

Please complete and submit this online application to be considered for funding from PMEP and its partners for FY2025.

See the RFP for instructions at: <http://www.pacificfishhabitat.org/funding-opportunities/>

Please direct questions to info@pacificfishhabitat.org.

Deadline for submitting proposals is 5 pm PST Friday, December 1, 2023.

You may create a draft of this application, save it, and come back to it later. However, we strongly suggest you save a copy of your answers in a separate file.

Project Overview

Requesting organization *

Total amount of funding requested from PMEP *

Project location description *

For example: Grays Harbor Estuary, Washington

Latitude of project *

Please use decimal degrees. Example: 46.960

Longitude of project *

Please use decimal degrees. Example: -124.017

Datum of lat/long coordinates *

Example: WGS 1984

Name of individual submitting application *

First Name

Last Name

Submitter's email *

example@example.com

Submitter's phone number *

(000) 000-0000

Name of project manager (if different from above)

First Name

Summary information

Project category

Please Select

Note that research projects are not eligible for NFHP funding. Assessments of fish habitats are eligible.

PMEP region *

Please Select

Habitat type *

Please Select

For estuary projects: Size Class

Please Select

Example: The Hanson Tidelands Restoration project will restore floodplain habitat connectivity to 270 acres of a working ranch providing juvenile rearing habitat to Coho salmon. Project sponsor will replace two failing tidegates, remove one tidegate, reconstruct 19,000 ft of tidal channels, construct 36,000 ft of livestock exclusion fencing, and plant 7,000 native hardwoods and shrubs. Implementing a cooperative Water Management Plan will maximize the effectiveness of new tidegates, improving control for summer grazing. The project is a high priority tidegate removal identified through The Nature Conservancy Optipass tidegate prioritization model which considers climate change.

0/100

Social and Ecological Benefits

Problem being addressed (1500 characters) *

Describe the problem being addressed by the project and why the project is necessary to address this problem. Note any local or regional plans that point to the need for the project. If this project addresses a new or emerging issue, explain the rationale behind the project approach and methods (described above).

0/1500

Please describe the project’s overall benefits. Explain how the project restores, enhances or protects estuarine and nearshore marine fish habitat. Describe how the project restores, enhances, or protects habitat-forming processes, ecological functions and connectivity. Note how the project benefits PMEP focal species.

0/1500

Fishing opportunities (1500 characters) *

Describe how the project benefits fish or invertebrate populations in a manner that leads to improved recreational, tribal, or commercial fishing opportunities.

0/1500

Public access - (1500 characters) *

Describe how the project increases public access. Public access includes visual access as well as physical access. Please describe to what extent your

0/1500

Project performance metrics

Upload Appendix C Project Metrics file and provide a brief narrative of your project's metrics and any notable metrics not included in the Appendix.

Attach project metrics (Appendix C) (xlsx. or pdf.) *

Browse Files

Drag and drop files here

Project metrics (500 characters) *

Provide a brief narrative description of the measurable metrics your project will achieve. Note any metrics that are not included in the Appendix C.

0/500

Project Design and Methods

Project methods and approach (1500 characters) *

Brief description the activities or methods used to achieve objectives of the project (1,500 characters or less). List your project objectives. Objectives are meant to be realistic targets or benchmarks that, if achieved, resolve the project need. Objectives are written in an active tense and use action verbs such as construct, survey, train, establish, repair, conduct, provide. Describe what stage of the project PMEP funded is needed for, the activities or methods you will use to achieve the stated objectives, and how the methods demonstrate sound design, appropriate procedures, and accepted fish and wildlife conservation or management principles.

0/1500

Climate change considerations (1500 characters) *

Describe how the project will perform under climate and ocean change scenarios and how it will contribute to ecological resilience over time. Cite appropriate climate and ocean change models, assessments, or scientific studies they have used to develop their project.

0/1500

Monitoring plan (1500 characters) *

Provide a summary of monitoring and evaluation plan. If available, include information on timeline for monitoring and/or evaluation. Describe your monitoring plan. What metrics or criteria will you use to evaluate the success of your project? How will you monitor for ecological outcomes in the short and long term? How will you modify your project if monitoring shows your

0/1500

Outreach - describe project outreach and education (1500 characters) *

Describe outreach and education activities associated with this project. Describe any engagement with and involvement of community members (including historically marginalized community members) in planning or implementing the project.

0/1500

Results dissemination - describe activities designed to disseminate project results (1500 characters) *

Describe plans to disseminate results of the project including the plan to develop project reports and monitoring reports. Describe if you will share project results at events and through professional channels, including the production and dissemination of final monitoring reports. Describe how you will share spatial data with PMEP for inclusion in PMEP's estuary and nearshore data layers.

Alignment with PMEP and NFHP Objectives

Does the project support PMEP's Goal to restore, enhance, and protect resilient estuarine, and nearshore marine fish habitat? *

Yes

No

PMEP Focal Species benefitted by project (check all that apply) *

- Green sturgeon
- Leopard shark
- Bat ray
- Pacific herring
- Bay shrimp
- Dungeness crab
- California halibut
- English sole
- Starry flounder
- Shiner perch
- Steelhead
- Coho salmon
- Chinook salmon
- Brown rockfish
- Staghorn sculpin

List USFWS priority species benefited by the project. (250 words) *

comma separated 0/250

List any species adversely affected by the project and explain how they are affected. (250 words) *

0/250

National Fish Habitat Partnership (NFHP) Goals (select all that apply) *

- Priority 1: Conserve waters and habitats where all processes and functions are operating within their expected range or natural variation.
- Priority 2: Conserve hydrologic conditions for fish.
- Priority 3: Conserve physical and living habitats and features that support viable and sustainable species and/or populations in impacted or at-risk systems.
- Priority 4: Reconnect fragmented fish habitats.
- Priority 5: Conserve water quality for fish.
- Priority 6: Support the structure and function of FHPs.
- Priority 7. Enhance recreational, commercial, subsistence, and traditional fishing opportunities when conducting projects that conserve fish habitat.

Is your project associated with a mitigation project? If so, please describe. (250 words)

0/250

Project Readiness

Will the portion of your project that PMEP may fund be completed within two years? *

- Yes No

Attach project timeline (Appendix B) (xlsx. or pdf.) *

Browse Files

Drag and drop files here

Are all permits in place for this project? *

Yes

No

Permits status (250 words)

List permits needed, their status, and date of expected receipt (status: received, applied for, pending, not yet applied)
0/250

What percentage of the overall project funding is secured? What percentage is pending? *

Budget

Total amount of Funding Requested from PMEP *

\$0.00

Total Project Cost *

\$0.00

- Yes
- No
- Still exploring options

Total matching funds for proposed project. *

Will this project be fully funded if PMEP funds are received?
